

Designed to meet the demands of heterogeneous storage environments  
Data Migration & Tiering | Archiving | Metadata Management | Technology Refresh

StrongLink Framework

Only StrongLink can Manage Storage Both IN & OUT of the Data Path

Features

- |                                    |   |
|------------------------------------|---|
| Multi-Vendor, Multi-Protocol       | Automated Data Lifecycle Management     |
| Cross-Platform Resource Management | Dynamic Data Mover                      |
| Global Namespace                   | Evergreen Data Management               |
| Metadata-Driven Workflows & Query  | Small File Optimization                 |
| Data Visualization & Analytics     | No Agents, No Stubs, No Symlinks        |
| Audit Trails & Reporting           | Supports both IN & OUT of the Data Path |

Benefits

### Remove Complexity

- Reduces IT burdens
- Ease of use & install
- Increase user productivity & collaboration

### Reduce Costs

- Seamless tiering & archiving
- Maximize storage efficiency
- Immediate ROI

### Enforce Data Protection

- Governance & data provenance
- One-click file recovery
- Simplified business continuity & disaster recovery
