

Optimize Your Object Storage with FUJIFILM OBJECT ARCHIVE

Object Archive

- Operates like AMAZON GLACIER but on-premise
- Reduce Costs for Object Storage by up to 80%
 - Software & Tape Subscription Model
 - Vendor Neutral Tape Library Support

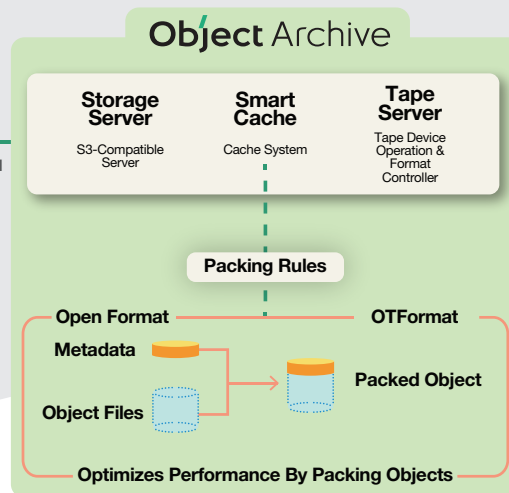

1

Object storage sent to archive.

2

Object storage policies automatically tier cold data to the FUJIFILM OBJECT ARCHIVE to free up space.

3

With FUJIFILM OBJECT ARCHIVE managing cold data, all tiers of storage can operate more efficiently.

LTO-7 & LTO-8

Create a Hybrid Cloud Storage

- Storage Cost Optimization
- Increase Scalability
- Avoid Egress Fees
- Decrease Storage Cost

Increase Data Security

- Air-Gap Protection
- Secure Chain-of-Custody
- Redundant Copies to Tape
- File Versioning

Enable Cold Data Archiving

- Keep Highly Confidential / Mission - Critical Data Protected Onsite
- Meet Regulatory Requirements
- Free up Valuable Space on Expensive Primary Storage

Lowest Data Storage Total Cost of Ownership

- Reduce Costs for Object Storage up to 80%
- Lowest Carbon Footprint & Energy Consumption

FUJIFILM OBJECT ARCHIVE software makes hybrid cloud storage, cold data archiving, and increased data security environments a reality for object storage by enabling S3-compatible API and modern tape. Now data centers can improve scalability, security, and decrease costs. Additionally, the tape-inclusive subscription model provides predictable storage spend and can be recognized as an operational expense.
